SYWIPE®

BRIEF INTRODUTIONG

SYWIPE is a leading China manufacturer of high-quality wet wipe products, dedicated to providing customers with the best solutions and helping them achieve their business goals. We offer excellent OEM/ODM services and are committed to building long-term partnerships, providing your brand with the highest quality products and services.

As a manufacturer of personal care wet wipes, we have years of production experience and a 100% biodegradable natural materials supply chain. We are committed to promoting sustainable development, providing environmentally friendly and superior quality wet wipe products, and creating a more sustainable future for our customers.

Our product line is designed for personal care and includes baby care wipes, baby/adult diapers, makeup remover wipes, wet toilet paper, anti-fog wipes, pet care wipes, household cleaning wipes, and more. We use the most advanced production technology and the highest quality standards to ensure that each product is the best.

SYWIPE is committed to providing customers with comprehensive services to meet your needs and expectations. Our products provide excellent value for your brand, helping your products sell better. We operate with integrity and our products' quality and reliability can be trusted, giving you peace of mind when choosing us.

SYWIPE welcomes the establishment of long-term partnerships with global customers, jointly promoting sustainable development and providing better products, creating a better future together.

SYWIPE®

Wet Wipes Manufacturing Process

QUALITY / SAFETY / EFFICIENCY / COST

SPEED

Get your product to market and in your consumer's hands faster.

FLEXIBILITY

Add new fragrances, sizing, portability to your product line quickly and easily.

CUSTOM

Stand out with the new ingredient trends or renewable packaging.

COST

Value without sacrificing quality, reliability or effectiveness.

How we reach this standard

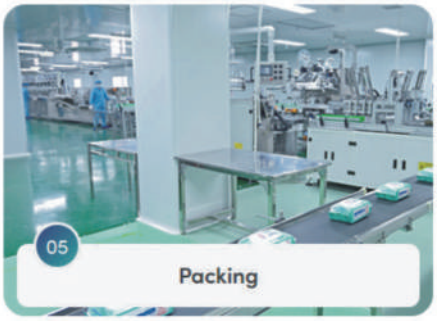

Staying ahead of your competition and establishing your brand requires ingenuity, strategic thinking, and flexibility.

Better care for the environment

We utilize plant cellulose fibers sourced from responsibly managed wood to provide the best solutio ns for personal care and hygiene products. Our production process is eco-conscious, with low water consumption and low carbon emissions. Our products are biodegradable and compostable in soil, freshwater, and marine conditions, contributing to a sustainable future. By using plant fibers, we return to nature and contribute to a better world for the Earth. This natural cycle concept forms a solid foun dation for our environmentally responsible applications.

Derived from responsibly managed wood sorces

responsible raw material sourcing

We utilize plant-based fibers derived from renewable wood resources through a pulping process to create fibers. Plant fibers offer inherent advantages in personal care and hygiene products: natural absorbency, liquid distribution, biodegradability, and versatility.
